Introduction

This report contains the retention and graduation patterns of full-time undergraduate students at Maryland's public four-year colleges and universities from 1985 to 2005. Specifically, it looks at the number and percentage of students who were retained at their original public four-year campus and those who graduated from any senior public college or university in the State.¹

Figures for the entering class of 1996 and beyond include changes resulting from the development of the Federal Graduation Rate Survey (GRS):

- Retention rates of all first-time undergraduates and not just first-time freshmen are included.
- Students who are enrolled at multiple institutions are included more than once in the cohort. Prior to the 1996 cohort these cross-enrolled students were reported at only one campus on a randomly selected basis.
- If an institution reports a new social security number for a student, the student is tracked on the basis of the new number. In earlier cohorts, these students were treated as having dropped from the institution. The impact of this change is greatest at institutions with a large number of foreign students, who are often assigned "dummy" social security numbers when they initially enroll.
- The method used to match student enrollment and degree attainment is based on the federal GRS procedures and on the recommendations of an intersegmental workgroup.

Information on cohorts from previous years remains unchanged. There are no significant policy changes in Maryland's data resulting from GRS.

This report includes Maryland residents who enrolled at a public institution between 1998 and 2005 and who subsequently transferred to a Maryland state-aided independent college or university. Nearly all of these institutions began providing the Commission with unit record information about the enrollment and degree achievement of new full-time students who are Maryland residents beginning in fall 2004. Also, Maryland residents who enrolled at a Maryland state-aided independent institution in 2005 have been tracked in to their second year and those who enrolled in 2004 have been tracked into their third year, providing second and third year retention rates. Statistics for the public institutions include all first time, full time students, regardless of residency.

¹ The University of Baltimore is excluded because it currently enrolls very few first-time students. The University of Maryland, Baltimore is excluded because it does not enroll first-time students. The University of Maryland University College is excluded due to its mission to serve the adult, part-time population.

Six-Year Graduation Rates: Maryland Public Institutions

- The six-year graduation rate for new full-time students in the 1998 cohort at Maryland public four-year campuses (58.2 percent) exceeded the national average for like institutions (53 percent), according to recent U.S. Department of Education statistics. These figures reflect the national definition: those students who earned a bachelor's degree from their original campus within six years.
- Using the definition historically employed by the Commission (those students who earned a bachelor's degree from any senior public college or university in the State), the six-year graduation rate for the most recent cohort of all new full-time students is at **an all time high** at 64.0 percent. The six-year rates have risen for seven consecutive cohorts (from 55.4 percent in 1993). The public institutions with the highest six-year graduation rates for the entering class of 2000 were St. Mary's (84.1 percent), UMCP (79.4 percent), and Salisbury (75.1 percent). These institutions, plus UMBC, experienced the highest six-year rate in their history.

Trends in 6yr Graduation Rate at MD Public 4yr Institutions

- The six-year graduation rate last year, the rate for Hispanic students increased dramatically to **an all time high** at 67.0 percent. The six-year graduation rate for African-Americans fell to 45.1 percent and is considerably lower than the rates for students of other ethnic groups.

Six-Year Graduation Rates at MD Public 4yr Institutions by Ethnic Group				
	1985	1990	1995	2000
All Students	53.9%	55.8%	58.4%	64.0%
African-Americans	32.2%	38.6%	43.1%	45.1%
Asians	62.5%	65.0%	68.1%	75.2%
Hispanics	54.3%	50.7%	52.1%	67.0%
Whites	60.6%	64.5%	67.1%	72.2%

- Asian students had the highest six-year graduation rates of any racial/ethnic group (75.2 percent), **an all-time high**.
- The four-year public institutions that had the greatest six-year graduation rates among African-Americans in the 2000 cohort were St. Mary's (72.7 percent) UMCP (70.4 percent), Towson (63.7 percent), Salisbury (62.5 percent) and UMBC (62.0 percent). The rates at Towson and UMCP were the highest in the institutions' history.
- The six-year graduation rates of both men and women reached all-time highs in the 2000 cohort: 67.7 percent for women and 59.7 percent for men. Since the Commission began collecting these statistics, the graduation rates of women have led men. However, the gap between men and women has steadily fallen from 10.7 percentage points in the 1997 cohort to 8 points in the 2000 cohort.
- The six-year graduation rate for African-American men was 38.7 percent while the rate for African-American women was 49.2 percent.
- As is the case for all students, the six-year graduation rate of African-American women has consistently exceeded the rate of African-American men. With the exception of one cohort (1988), the difference between African-American men and women has been greater than the average of all males and females. Since 1997, however, African-American males have reduced the gap by one-third, from 15.9 percentage points to 10.5 percent in the 2000 cohort.

Second Year Retention Rates: Maryland Public Institutions

- The second-year retention rate of all full-time, first-time undergraduates, as measured by the percentage of those returning to their original campus after one year, was 79.8 percent for the 2005 cohort. This is the first time in twelve years that the second-year retention rate has been below 80 percent.

2nd Yr Retention at Md Public 4yr Institutions: 2005 Cohort

- The second-year retention rate for African-American students dropped for the third straight year to 72.2 percent, the lowest in eighteen years. The retention rate of African-American students was lower than the rate of students from any other racial and ethnic group. Asian students had the highest retention rate (86.3 percent).
- The second year retention rates at UMCP (91.6 percent) and St. Mary's (86.7 percent) exceeded those at all other public four-year institutions.
- The second year retention rates of African-American students in the 2005 cohort were the highest at UMBC (91.6 percent), UMCP (89.2 percent), St. Mary's (86.3 percent), and Towson (84.8 percent). The second year rates of African-American students at UMBC and Towson exceeded those of whites.
- Female students have always exceeded their male counterparts in second year retention since the Commission began collecting these figures. The second-year retention rate was 80.4 percent for women and 79.0 percent for men.
- African-American females have achieved higher second year retention rates than African-American male students in all but one cohort (1988). The 2005 cohort rate for African-American women was 73.5 percent while the rate for men was 69.9 percent.

Second-Year Retention Rates: Maryland Residents at Maryland State-Aided Independent Institutions

- The second-year retention rate of all full-time, first-time undergraduate Maryland residents, as measured by the percentage of those returning to their original campus after one year, was 79.1 percent for the 2005 cohort, up from 77.7 percent for the 2004 cohort. The 2005 cohort second year retention rates of Maryland residents at Johns Hopkins University (90.1 percent), Loyola College (87.8 percent) and McDaniel College (85.7 percent) exceeded those at all other State-aided independent institutions in Maryland.
- The second-year retention rate for African-American Maryland resident undergraduates was 64.6 percent, down over three percentage points from the prior year and 14.5 points lower than that of all students. The second year retention rates of African American Maryland residents at Johns Hopkins University (95.0 percent), McDaniel College (86.4 percent) and Villa Julie College (80.7 percent) exceeded those for African American Maryland residents at all other State-aided independent institutions in Maryland.
- For the second straight year, the second-year retention rate for men (79.9 percent) was slightly higher than that for women (78.7 percent) among Maryland residents at state-aided independent institutions.
