MARYLAND HIGHER EDUCATION COMMISSION

CREATING A STATE OF

ACHIEVEMENT

MHEC

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 13.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One reason is that the public sector has become a more important part of the economy. Another reason is that the public sector has become a more attractive place to work. A third reason is that the public sector has become a more important part of the welfare state.

The increase in the number of people employed in the public sector has led to a number of changes in the way that the public sector is organized. One change is that the public sector has become more decentralized. Another change is that the public sector has become more market-oriented. A third change is that the public sector has become more customer-oriented.

The changes in the way that the public sector is organized have led to a number of challenges for the public sector. One challenge is that the public sector has become more complex. Another challenge is that the public sector has become more competitive. A third challenge is that the public sector has become more demanding.

The challenges that the public sector faces are a result of the changes in the way that the public sector is organized. The public sector must find ways to meet these challenges if it is to continue to provide the services that it is expected to provide.

One way that the public sector can meet these challenges is by improving the way that it is organized. Another way is by improving the way that it is managed. A third way is by improving the way that it is funded.

The public sector must find ways to meet these challenges if it is to continue to provide the services that it is expected to provide. The public sector must be able to provide the services that it is expected to provide in a way that is efficient, effective, and customer-oriented.

The public sector must be able to provide the services that it is expected to provide in a way that is efficient, effective, and customer-oriented. The public sector must be able to provide the services that it is expected to provide in a way that is efficient, effective, and customer-oriented.

Note: The designation of students as "core" or "non-core" depends on whether the student completed a course of study in high school that corresponds to the freshmen admissions requirements of the University System of Maryland.

To be considered "core", a student must have completed all of the following:

- (1) 4 or more years of English;
- (2) 3 or more years of mathematics;
- (3) 3 or more years of social science or history;
- (4) 2 or more years of natural science and;
- (5) 2 or more years of a foreign language.

Note:
 (1) Second year retention rates are for the 2005 cohort of all full-time, first-time undergraduates at their original institution and the graduation rates are for 2000 new full-time undergraduates at any Maryland four-year institution.
 (2) University of Baltimore admitted few first-time undergraduates and University of Maryland, Baltimore does not enroll first-time freshmen. These campuses were excluded.
 (3) University of Maryland University College is excluded due to its mission to serve the adult part-time population.

the 1990s, the number of people with diabetes has increased in all industrialized countries. In the Netherlands, the prevalence of diabetes is estimated to be 6.5% in 1995, which corresponds to 1.5 million people (1).

Diabetes is a chronic disease with a high prevalence of complications. The most common complications are retinopathy, nephropathy, neuropathy, and cardiovascular disease. The prevalence of these complications is high, and the risk of complications increases with the duration of the disease (2).

The most common complication of diabetes is cardiovascular disease. The prevalence of cardiovascular disease is high, and the risk of cardiovascular disease increases with the duration of the disease (3). The most common cardiovascular complication is coronary artery disease, which is the leading cause of death in people with diabetes (4).

Diabetes is a chronic disease with a high prevalence of complications. The most common complications are retinopathy, nephropathy, neuropathy, and cardiovascular disease. The prevalence of these complications is high, and the risk of complications increases with the duration of the disease (5).

The most common complication of diabetes is cardiovascular disease. The prevalence of cardiovascular disease is high, and the risk of cardiovascular disease increases with the duration of the disease (6). The most common cardiovascular complication is coronary artery disease, which is the leading cause of death in people with diabetes (7).

Diabetes is a chronic disease with a high prevalence of complications. The most common complications are retinopathy, nephropathy, neuropathy, and cardiovascular disease. The prevalence of these complications is high, and the risk of complications increases with the duration of the disease (8).

The most common complication of diabetes is cardiovascular disease. The prevalence of cardiovascular disease is high, and the risk of cardiovascular disease increases with the duration of the disease (9). The most common cardiovascular complication is coronary artery disease, which is the leading cause of death in people with diabetes (10).

Diabetes is a chronic disease with a high prevalence of complications. The most common complications are retinopathy, nephropathy, neuropathy, and cardiovascular disease. The prevalence of these complications is high, and the risk of complications increases with the duration of the disease (11).
